SUMMARY

Lead Product Designer specializing in enterprise SaaS, fintech, and AI-powered products. Experienced in leading cross-functional initiatives from discovery to launch, scaling design systems, building high-performing design teams, and shaping product strategy alongside executive stakeholders. Strong focus on complex UX, AI-assisted design, and turning ambiguous business problems into intuitive product experiences.

EDUCATION

Applied Mathematics (Bachelor's Degree)	Russian State University for the Humanities (RSUH)	Sep 2019 – Jun 2023
Moscow, Russia		
Studied applied mathematics with a focus on analytical thinking, systems modeling, and software-related disciplines.

EXPERIENCE

Lead Product Designer (Moscow, Russia)	Sber	May 2025 – Present
Senior Product Designer (R&D)		2020–2024
Lead product design for an enterprise platform used by over 290,000 employees across Web, PWA, iPad, and Mobile.		
Partnered closely with the CPO, product managers, and engineering teams to define product strategy and deliver large-scale UX initiatives.		
Drove the launch of Pulse 2.0 , introducing AI-powered experiences and establishing AI-assisted design workflows across the team.		

Key achievements

- Lead the redesign and rollout of the next-generation enterprise platform.

- Introduced AI-powered search, assistant, and personalized recommendations.
 - Improved UX consistency across four platforms through scalable design patterns.
 - Established AI-assisted prototyping workflows using Claude, Codex, and Figma, significantly accelerating concept validation and stakeholder alignment.
 - Delivered complex enterprise experiences in collaboration with executive stakeholders.
